

# ECOFOREST IS AWARDED WITH THE GACELA\* PRIZE

\*gazelle

We are pleased to announce that Ecoforest received the diploma which identifies us as one of the companies in the 2017 Gacela Companies ranking. This ranking shows the new Spanish companies which showed a fastest growth in their first three years.

What does Gacela Company mean? Gacela companies are those companies which showed a yearly growth over 20% during 3 consecutive years at least. This means that Gacela companies represent the living dream of any entrepreneur.

According to Emprendedores magazine, involved in issuing this prize, several features are common to the Ecoforest philosophy:

## **Sustained and above-average growth**

Companies with a high growth rate and in a short time. Another feature of this kind of companies is the ability to keep a sustained growth while reinvesting their income to improve their business and keep growing.

## **Flexible**

Adapting to the market and the changes that may happen in it.

### **Profitable**

Since we are talking about companies with a profitableness over 15%.

### **Young companies**

With 5 and 10 years, they start to take off after their creation phase is concluded.

### **Job generators**

Generation of constant employment, new jobs and creation of new substructures within the company where it is necessary to hire more staff.

For these reasons it is for us a pride to belong to this list, which also empowers us to keep advancing and developing the task we started since the creation of Ecoforest in the renewable energy sector. We are working everyday not just with the objective of growing as a company, but also with the hope of developing unique and technologically advanced products to turn this planet into a better place.
