

# ECOFOREST NEW HEADQUARTERS

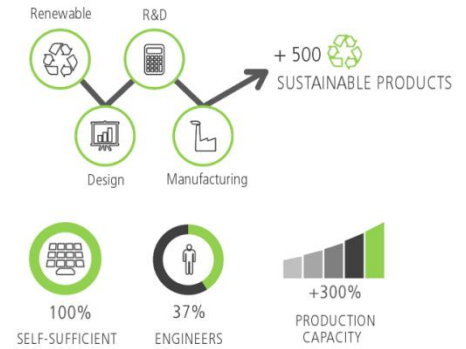

At the end of 2016 we released the news about our acquisition of more than 15.000 m<sup>2</sup> for the construction of our new headquarters in the Porto do Molle Business Park. With this acquisition we will move our headquarters for the second time in 5 years.

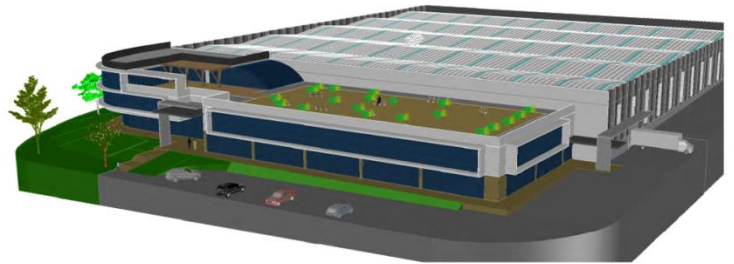

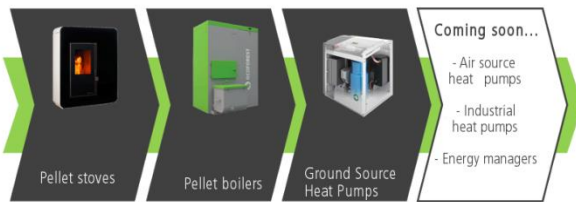

13.500 m<sup>2</sup>

Laboratory 1.400 m<sup>2</sup> / Showroom 500 m<sup>2</sup> / Training rooms 100 m<sup>2</sup> / Offices / Factory

## ECOFOREST PHILOSOPHY

## 7 PRODUCTION LINES

Ecoforest new headquarter in Porto do Molle, Nigrán

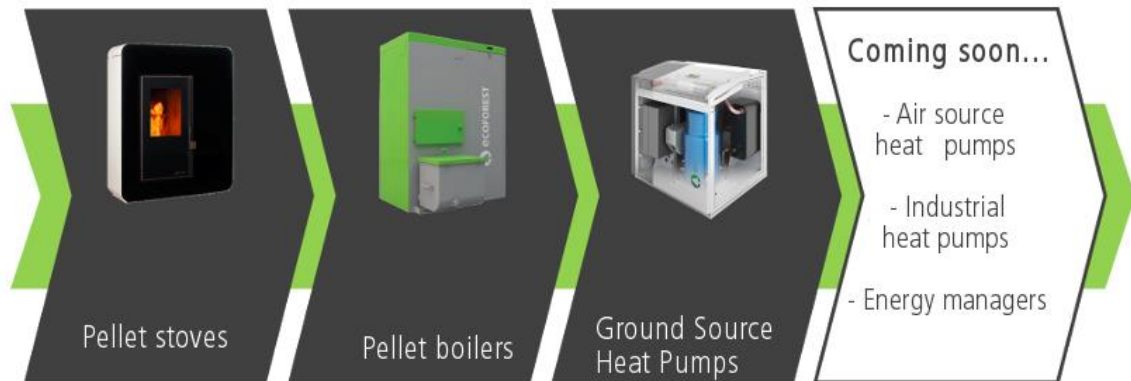

Ecoforest needs new headquarters due to our continuous growth and improvement in every department of the company, incorporation of a new product range, increase of the sales volume, number of partners and members of the team. This is attainable thanks to our greater international projection that has brought us so far to more than 36 countries, having as a short term objective growing to new countries and improving our presence and projection in the countries in which we are already present.

We will be able to share more details regarding the construction works which will start at the beginning of August 2017. The building will count with an effective surface of 13.500m<sup>2</sup> where every ambit of the company will take place. According to our innovative ideals and our commitment with the environment and the renewable energies, we designed a self-sufficient and high end installation.

Ecoforest's new facilities will be a self-sufficient building. Regarding HVAC, the installation is built with our ground source heat pumps and supported with a PV installation. Our latest energy managers, the E-System and the E-Manager, products which will mean a revolution in the market, are also present in this installation. In these new facilities we will keep putting a lot of effort in Research and Development. To do so, our laboratory will count with more than 1.400m<sup>2</sup> and it will be equipped with the latest technology, so our colleagues from the technical department can keep doing what characterizes us the most, developing the latest technology in the heat pump and pellet stove and boiler business.

At the same time, our production plant will count with a significant increase. Nowadays, our factory has four production lanes, two for the production of pellet stoves and boilers and two for the production of ground source heat pumps. Our new factory will have seven production lines destined to the following products:

## 7 PRODUCTION LINES
